

Welcome

We would like to welcome you to the seventh annual Nampara Angus Bull Sale.

Our bull sale is one part of a 15000 head mixed sheep and 2000 head cattle commercial operation. With our commercial focus Nampara offer buyers an affordable selection of big, heavily-muscled bulls with strength of bone and shape concentrating on daily gain, finishing ability and fertility.

At Nampara, females have to get in calf by two years of age, calve unassisted and raise a good calf year in year out. In 2014, for the sixth consecutive year, Nampara secured top price at the Naracoorte PTIC Female Sale, reflecting our consistency to supply an Angus female type.

Nampara bulls deliver an honest no-frills alternative to other stud Angus operations. At Nampara we:

- Focus on grass-fed attributes therefore less prone to breakdowns
- Concentrate on calving ease not birth weight
- Only retain females who get in calf and calve unassisted by 2 years of age
- Do not foot trim or clip hair to hide faults
- Rectify any problems with purchased bulls promptly
- Guarantee all bulls into their second working season.

Nampara-bred livestock are sought after in the marketplace. In the last twelve months, Nampara-blood steers out of the Dartmoor area were consistently among the “pick pens” of steers in the winter store sales at Mount Gambier. Similarly, Nampara-finished loads of steers at JBS averaged up to \$1430 this season.

This year's consistent draft of 65 sale bulls are by sires including Raff Empire, Raff Explosive, Wittalocka Freightliner F76, Aberdeen Estate Fokker and Nampara E40. With a focus on grass-fed attributes the bulls will be competitive weights come sale day, are supported by above average performance figures, both Breedplan data and actual measurements and have been semen tested. All sale bulls are guaranteed into their second working season and are well-known for their temperament. Nampara has a Beef Only Status. All sale bulls have been vaccinated for Vibrio, Pestiguard, and a 7 in 1 needle including their follow up vaccinations.

We are pleased with our draft of 2015 sale bulls, and if we can be of assistance to you prior to, or after the sale, please do not hesitate to contact us.

Stuart and Natalie Hann

Inspection of Bulls – On the property from 2pm on the afternoon of the sale. Bulls will be on display on Tuesday 3rd February as part of the Victorian Beef Week at Mortlake as well as on property on Tuesday 10th February as part of the SA Beef Field Days or for inspection on property any time by arrangement.

Delivery – To be co-ordinated immediately after the sale, either to be trucked directly from the property or arrangements made with the vendor to paddock animal/s until trucking available. Bulls will be delivered free within 150km of Nampara and all bulls sold will be freight assisted.

Fertility – The bulls are guaranteed fertile. Notice of infertility in all cases of such, to be in writing and in the hands of the vendor not later than six calendar months from date of sale.

The purchase price of any bull proved to be infertile shall be refunded in full (less the salvage value) without interest expense, cost or damages. A vet's certificate shall be produced by the purchaser when required.

Rebate – 3% to outside agents introducing buyers in writing to the selling agents 24 hours prior to the sale and settling within seven days. Does not apply to affiliates of selling agents.

GST – All lots are sold exclusive of GST.

Insurance – Nampara recommends insuring all purchases at the fall of the hammer. An Elders insurance representative will be available on sale day to help with this.

Guarantee – In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain an independent veterinary confirmation of any claim.

Disclaimer – Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue and the information neither the vendors, selling agents or representatives thereof assume any responsibility what so ever for the correctness, use or interpretation in the information of animals included herein.

NAMPARA ANGUS - EBV DESCRIPTION

Brief Description of EBV's

Calving Ease DIR (%) Estimates of the genetic differences between animals in the ability of their calves from 2yr old heifers to calve without assistance. Positive values are desirable.

Calving Ease DTRS (%) Estimates of the genetic differences between animals in the ability of their 2yr old daughters to calve without assistance. Positive values are desirable.

Gestation Length (days) Estimation of the genetic differences between animals in the number of days from conception to the birth of a calf. A negative value is desirable.

Birth Weight (KG) Estimates of the genetic differences between animals in calf birth weight.

200-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight Estimates of the genetic difference between animals in cow weight at 5yrs of age.

Milk Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight Estimates the genetic differences among animals in hot standard carcass weight at 650 days of age.

Eye Muscle Area (EMA) – cm² Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300kg carcass.

Rump Fat Estimates of genetic differences among animals in fat depth at the P8 rump site on a standard 300kg carcass.

Retail Beef Yield Estimates of genetic differences among animals in percentage retail beef yield in a 300kg carcass with 2-3mm fat trim, adjusted to 85% chemical lean.

Intra-Muscular Fat % (IMF%) Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300kg carcass.

Angus Breedplan - Average EBV's for all 2013 drop calves January 2015 Angus BREEDPLAN

Explanation of Raw Data Information

Actual Eye Muscle Area – cm² The actual eye muscle area recorded for Breedplan data.

Actual Intra-Muscular Fat % The actual recorded percentage of intra-muscular fat for Breedplan data.

Scrotal Circumference The actual scrotal circumference measurement recorded.

P8 (mm) The actual measurement of fat at the P8 site for Breedplan data.

Rib Fat (mm) The actual measurement of fat depth at the 12/13th rib site.

Daily Gain Weight on 9.12.14 divided by age in days.

An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure. :

A score of 5 is ideal

A score of 4 or 6 shows a slight variation, but this includes most sound animals.

An animal scoring 4 or 6 would be acceptable in any breeding program

A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs

A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing

A score of 1 or 9 should not be catalogued and are considered immediate culls

Beef Class Structural Assessment has been conducted by Accredited Assessor:

Max Bowman (#1026) on 10th December 2014
