AuctionsPlus

Welcome

Welcome to our thirteenth annual bull sale and the first for our new starting time of 3:30pm (SA time). The 75 bulls catalogued are heavily muscled, free moving bulls with a little extra frame. Consistency is again a feature of the draft with the bulls breeding true to their type and sire lines. Feature sires for the 2021 sale include Texas Western Express H220, Nampara Liberty L21 and LD Capitalist.

The Western Express and Liberty sons are really powerful heavy steer producing bulls with plenty of bone, presence and power. The popular calving-ease sire LD Capitalist has also left his mark with an excellent line of low birth weight high growth bulls that are really thick and not a typical heifer bull option.

Some 30 bulls in the draft have been used to join 600 PTIC females destined for the Naracoorte, Mortlake and Mt Gambier feature female sales in January. These bulls have proved very popular in the past and have been specifically selected for heifer joining.

All Nampara bulls are structurally assessed and fertility tested and are well known for their quiet temperament.

- Concentrate on calving ease not birth weight
- Only retain females who get in calf and calve unassisted by 2 years of age
- Only retain females who get in calf every year
- Do not foot trim or clip hair to hide faults
- Rectify any problems with bulls purchased promptly

By assessing structure, temperament and calving –ease and by using a limited number of sires over large mobs, we can more accurately appraise the impact a sire is having within the herd. The joined heifer program also means that we are aiming to breed the type of heifer bulls that can be confidently used to mate heifers whilst at the same time not compromising on shape or frame.

For the first time this year, buyers will also be able to operate at the sale through AuctionsPlus even if they can not attend in person. All sale bulls are guaranteed into their first working season and Nampara has a JBAS 6 Status. All sale bulls have been vaccinated for Vibrio, Pestiguard, and a 7 in 1 needle including their follow up vaccinations.

We are very proud to present a draft of bulls with sire lines that are true to their type. This allows buyers to select from a number of bulls within each sire grouping. We are also proud of the fact that our cattle are working and making a difference in the commercial world, the true driver of profit which is, and should be, why we do what we do.

If we can be of assistance to you prior to, or after the sale, please do not hesitate to contact us.

Stuart and Natalie Hann

Inspection of Bulls - On the property from 1pm on the afternoon of the sale. Bulls will be on display on Friday 29th January as part of the Victorian Beef Week at Mortlake as well as at Strathalbyn on Sunday 7th February in addition to our on property open day on Monday 8th February as part of the SA Beef Week or for inspection on property any time by arrangement.

Delivery - To be co-ordinated immediately after the sale, either to be trucked directly from the property or arrangements made with the vendor to paddock animal/s until trucking available. Bulls will be delivered free within 150km of Nampara and all bulls sold will be freight assisted.

Fertility - The bulls are guaranteed fertile and have been tested on the 7th January 2021 by Drew Pickford of Nationwide AB. Notice of infertility in all cases of such, to be in writing and in the hands of the vendor not later than six calendar months from date of sale.

The purchase price of any bull proved to be infertile shall be refunded in full (less the salvage value) without interest expense, cost or damages in the form of a credit at a future bull sale. A vet's certificate shall be produced by the purchaser when required.

Rebate - 3% to outside agents introducing buyers in writing to the selling agents 24 hours prior to the sale and settling within seven days. Does not apply to affiliates of selling agents.

GST - All lots are sold exclusive of GST.

Insurance - Nampara recommends insuring all purchases at the fall of the hammer. An Elders insurance representative will be available on sale day to help with this.

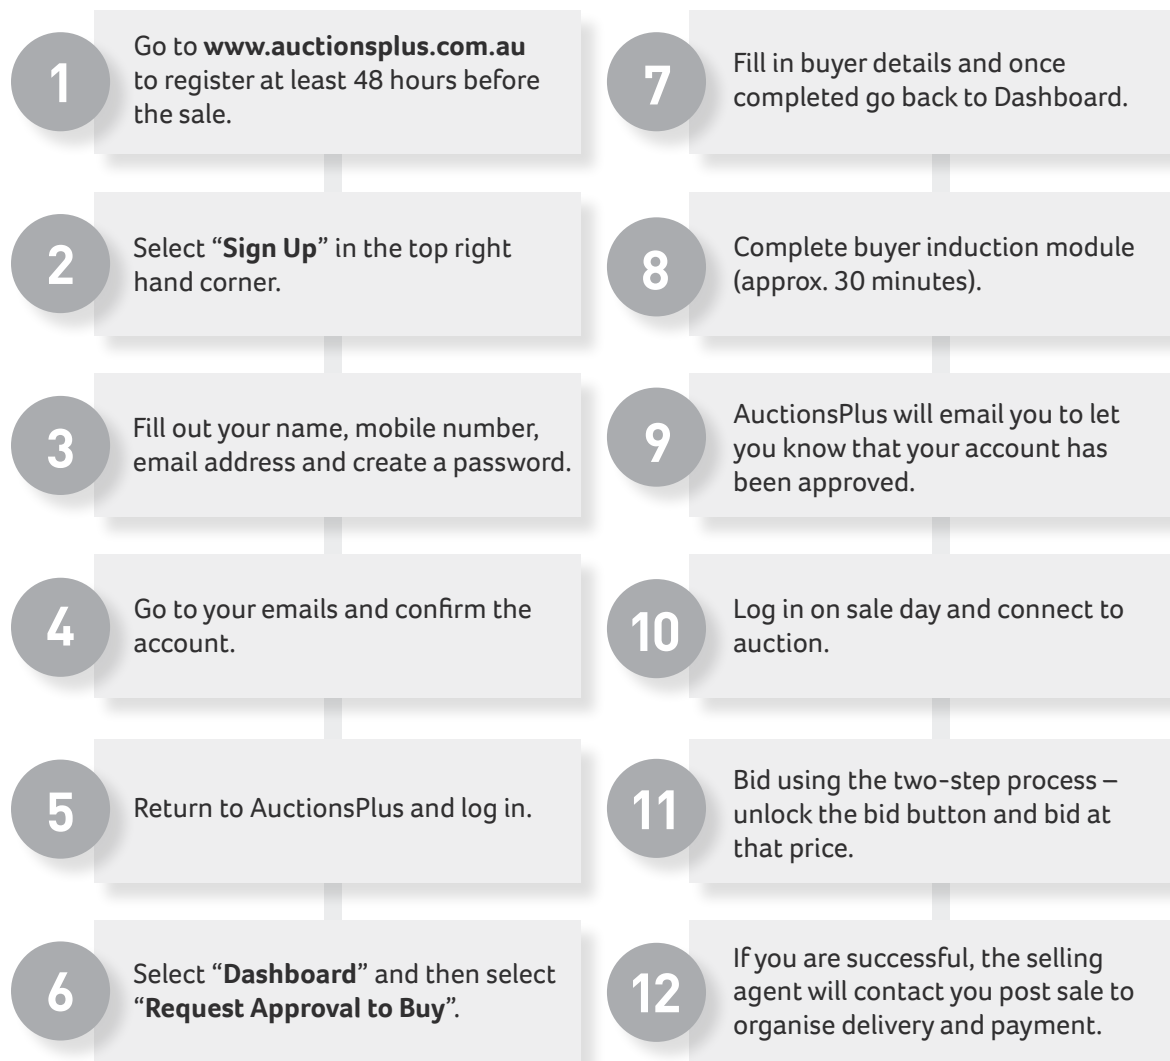

Guarantee - In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain an independent veterinary confirmation of any claim. In the unlikely event that a credit is issued, it may only be claimed on one bull at a future bull sale.

Disclaimer - Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue and the information neither the vendors, selling agents or representatives thereof assume any responsibility what so ever for the correctness, use or interpretation in the information of animals included herein.

Brief Description of TransTasman Angus Cattle Evaluation

Calving Ease DIR (%) Estimates of the genetic differences between animals in the ability of their calves from 2yr old heifers to calve without assistance. Positive values are desirable.

Calving Ease DTRS (%) Estimates of the genetic differences between animals in the ability of their 2yr old daughters to calve without assistance. Positive values are desirable.

Gestation Length (days) Estimation of the genetic differences between animals in the number of days from conception to the birth of a calf. A negative value is desirable.

Birth Weight (KG) Estimates of the genetic differences between animals in calf birth weight.

200-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight Estimates of the genetic difference between animals in cow weight at 5yrs of age.

Milk Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight Estimates the genetic differences among animals in hot standard carcass weight at 650 days of age.

Eye Muscle Area (EMA) – cm² Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300kg carcass.

Rump Fat Estimates of genetic differences among animals in fat depth at the P8 rump site on a standard 300kg carcass.

Retail Beef Yield Estimates of genetic differences among animals in percentage retail beef yield in a 300kg carcass with 2-3mm fat trim, adjusted to 85% chemical lean.

Intra-Muscular Fat % (IMF%) Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300kg carcass.

Net Feed Intake Estimates of genetic differences between animals in feed intake at a standard weight and rate of weight when in a feedlot finishing phase.

TACE Breed Average – January 2021

Explanation of Raw Data Information

Actual Eye Muscle Area – cm² The actual eye muscle area recorded for Breedplan data.

Actual Intra-Muscular Fat % The actual recorded percentage of intra-muscular fat for Breedplan data.

Scrotal Circumference The actual scrotal circumference measurement recorded.

P8 (mm) The actual measurement of fat at the P8 site for Breedplan data.

Rib Fat (mm) The actual measurement of fat depth at the 12/13th rib site.

An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure. :

A score of 5 is ideal

A score of 4 or 6 shows a slight variation, but this includes most sound animals.

An animal scoring 4 or 6 would be acceptable in any breeding program

A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs

A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing

A score of 1 or 9 should not be catalogued and are considered immediate culls

Beef Class Structural Assessment to be conducted by Accredited Assessor:

Max Bowman (#1026) prior to sale.

NAMPARA ANGUS - SALE BULLS 2021

Lot 1 : Nampara Q129

AMFU, NHFU, CAFU, DDFU

Big strong bull to start the sale. Q129 is the first son of New Zealand sire Stern 15815 to sell at auction in Australia making him a complete outcross to most Australian genetics. A little more frame than your average NZ bull but none the less, plenty of grunt, very free moving, big arse.

Buyer

Heifer's first calf. Possibly the best heifer bull we've ever bred. This bull backed up 60 AI stud heifers and then backed up 40 stud cows. On paper he's extremely good for calving ease (top 5% of the breed), has huge EMA (top 4% of the breed) scrotal size is in the top 6% and he's not too shabby in the flesh. A big butted, extremely quiet bull that is soft as butter. Without a doubt stud sire potential. Semen retained.

The first Nampara bull by Western Australian sire, Coonamble Junior and he's a ripper. This very quiet bull is the definition of length, width and depth. He is a proper bull. He moves like a cat with real presence and is bull you just can't go past. He's in the top 15% for carcass weight and the top 7% for Net Feed Intake. Backed up stud cows. We've been harping on about this bull but we believe he truly has stud sire potential and is one of the better bulls we've bred. Semen retained.

This is a proper cow bull. By the \$85,000 Nampara Liberty, a very correct, stylish, free moving, heavy steer producing bull that will breed very nice females. His growth figures are off the chart being in the top 5% for 200, 400 and 600 day weight. Top 6% for carcass weight and top 1% for Net Feed Intake. Out of an 11 year old female who has had one of the better calves every year.

Another powerful Western Express son who covers some ground. He's long, stylish free moving and easy doing. He's in the top 10% for all growth traits, top 1% for carcass weight and top 2% for scrotal. A cow bull with moderate birth and huge 600 day. Should be considered for stud duties but will make a cracking commercial bull. A very nice bull with figures to match.

SPRING BULLS Lots 41 - 47

Please note that the next pen of bulls are significantly younger than the main draft as they are from our spring calving mob. They are all by Ben Nevis Nation N120 – a smart son of the \$70,000 Ascot Lion Heart. For young bulls they have plenty of shape and style and whilst they give away some age, they are sure to grow on into big strapping bulls.

Lot 44: Nampara Q276

AMFU, NHFU, CAFU, DDFU

Nice, young bull to finish on with a well rounded set of figures and a well rounded rear end.

Buyer

Price

A Note on Semen Testing

As with any species, fertility can be a problem. This is why Nampara semen test ALL sale bulls.

Bulls are examined by Nationwide Artificial Breeders for abnormalities including warts, penile fraenulum and erection issues, as they undergo a physical examination of external genitalia and conformation.

The crush side test involves analysis of spermatozoa for motility, concentration, morphology and semen infections. This information provides testicular and epididymal function which helps predict the potential fertility of the bull. Only bulls that pass are certified and made available for sale.

A satisfactory result gives a high chance of fertility HOWEVER, please observe your new bull in action when first in service, complete with a thrust!! Stress of an animal can also affect fertility. Look after your bull! The most conscious producer will semen test all herd bulls, every year, before joining.

For any questions contact Drew Pickford, Nationwide Artificial Breeders Pty Ltd.

Ph: 0428 925 255

Well done to the Linke family for achieving \$5.08 per kg for their 359kg calves.
Also congratulations to the Holcombe family for achieving \$4.84 per kg for their 419kg calves returning \$2028.
Both families have been using Nampara bulls for a number of years and we congratulate them on their results at the 2021 Hamilton Weaner sale.
